STC Batch CSV Installation

1. Open index.php with notepad.

2. Modify the declared variables area:

```
// **************************************** //
// ******** DECLARE VARIABLES ************ //
// **************************************** //

$username = 'guest';
$password = 'guest123';

$random1 = 'secret_key1';
$random2 = 'secret_key2';

// **************************************** //
// ****** END DECLARE VARIABLES ********* //
// **************************************** //

Change guest, guest123 and secret_key with your own.
```

3. Save the index.php file.

4. Upload the everything to a new directory you create on your web site.

5. Chmod data directory writeable, either 0755 or 0777 depending on your server setup.

6. Visit the new directory you created with your favorite browser.

7. Log in using the username and password you added in step 2 above.

8. Enter information into the form to create STC Batch CSV files for uploading to SexToyClub.

Note: About Continue and Start Fresh radio buttons:

    a.) Using Continue allows you to add multiple orders to one CSV file.

    b.) Using Start Fresh allows you to create a brand new CSV file.
